

CHEDY KORBI

Engineering Student — Big Data & AI · Software, IoT & AI/ML Developer

chedykorbi2021@gmail.com | +216 58 239 045 | linkedin.com/in/chedy-korbi | github.com/ChedyKorbi | La Marsa, Tunis

PROFILE

Engineering student in Big Data & AI at Polytech International, holding a Licence in Embedded Systems & Mobile Development. Strong software development background, mobile, web, and IoT, built through multiple internships, freelance projects, and team collaborations delivering real products under tight deadlines. Actively building my AI/ML and data profile through ongoing projects and certifications. Curious, autonomous, and always eager to learn and grow. Seeking a summer 2026 internship in AI/ML, data, or software development.

PROFESSIONAL EXPERIENCE

Freelance Software Developer · Independent

2023 – Present

ATASMIYA — Halal Traceability & Certification Platform

End-to-end halal platform for suppliers, restaurant managers, and consumers across France and Europe. Admin back-office for managing products, batches, restaurants, and monthly certificate allocation/suspension with real-time logistics supervision. Flutter mobile app covering two profiles: restaurant manager scanning received batches to obtain monthly halal certification, and consumer verifying certificate validity via QR code. Offline-first architecture, GPS anti-fraud validation, and push notifications.

Flutter · Next.js · Spring Boot · MySQL · AES-256 · JWT · Firebase

SCIO — Nutritional Evaluation App

Application mobile cross-platform (iOS & Android) pour une experte nutritionniste : scan de codes-barres de produits alimentaires, cosmétiques et ménagers, avec génération d'une fiche produit validée incluant composition, score qualité et statut (Excellent / Bon / Moyen / Mauvais). Moteur de scoring ML basé sur Random Forest, régression pour le score qualité, classification pour le statut, entraîné sur la base de produits validée par l'experte, avec indicateurs de risque codes couleur explicables.

Flutter · Spring Boot · MySQL · REST APIs · Scikit Learn

CIM SALABYM — E-commerce & Management Back-Office

End-to-end digital solution for a ceramic decoration brand: fully customisable Next.js storefront (products, categories, collections, delivery, editorial content, images) with Stripe payments and OAuth. Admin back-office covering inventory, orders, CMS, CRM, and full site configuration — a bespoke, self-managed tool delivered end-to-end.

Next.js · Spring Boot · Stripe · OAuth · MySQL

Final-Year Internship — IoT & Full-Stack · Symatique Software

Jan 2025 – Jun 2025

PawTracker — IoT pet health monitoring ecosystem: ESP32 sensors continuously collecting activity and vital data, analysed by supervised regression and classification models calibrated to each animal's breed and age to detect deviations from optimal health thresholds. Android app with live GPS tracking, health dashboards, and alerts; VetLink — Angular platform for veterinarians with patient records and appointment management.

ESP32 · C/C++ · MQTT · Android Java · Spring Boot · Angular · MySQL · Firebase · Scikit-learn

Summer Internship — Android Developer · Sagemcom Software & Technologies

Jul 2024 – Aug 2024

Android inventory management app for the water-sensor R&D team: full product CRUD, advanced filtering, and local SQLite database. Integrated an EfficientNet CNN (TensorFlow Lite) for automatic recognition of existing products via camera — -80% data-entry errors, identification time cut from 30 s to under 5 s.

Android Java · TensorFlow Lite · EfficientNet · Room DB · SQLite · ZXing

EDUCATION

Engineering Degree — Big Data & AI · Polytech International

Sep 2025 – Present | Tunis

First-year common core in progress. Specialisation in Big Data & AI.

Licence — Embedded Systems & Mobile Development · ISET Charguia

2022 – 2025 | Tunis

GPA 16.78/20 . Core modules: IoT systems, embedded C/C++, Android development, computer networks.

PROJECTS

Intelligent Report Generator · Samsung Innovation Campus AI Capstone — **Score 94% — Top 6%**

Multi-modal AI system generating structured consumer reports from electronic product images and customer reviews from Amazon kaggle datasets. EfficientNetB3 pipeline (visual recognition) combined with a parallel NLP stack , BiLSTM, BERT, SmolLM2-1.7B, for sentiment, emotion, and feature extraction. Hybrid summarisation with BART / T5 / Qwen2.5 producing a clean structured report. Streamlit interface + Flask backend.

Python · TensorFlow · PyTorch · EfficientNetB3 · BERT · Qwen2.5 · Streamlit · Flask

GetHired AI · Full-Stack AI Recruitment Platform

End-to-end recruitment platform — two portals, one goal: connecting the right candidates to the right recruiters through AI. Candidate side: CV analysis and enhancement, explainable fit scoring (0–100), personalised certification and skill recommendations to reach the target role, and interview preparation. Recruiter side: automatic candidate ranking based on profile and job requirements, interview plan generation, and targeted outreach. Multilingual (EN/FR), 18 AI modules.

Next.js 16 · Spring Boot · Groq LLM QWEN 3.5 · TypeScript · Tailwind · JWT

Aether Analyst · Local-First RAG & AI Data Science Agent · Personal Project

Production-grade AI analytics platform combining autonomous data analysis and local RAG pipelines for datasets and documents. Built an agentic LangGraph workflow capable of generating and executing Python code securely, self-correcting errors, and producing insights, visualisations, and reports. Implemented local embeddings + vector search for grounded document Q&A with full offline privacy using Ollama-hosted LLMs.

Python · LangGraph · LangChain · Ollama · Qwen2.5 · FAISS · Pandas · Plotly · Streamlit · RAG · Agentic AI

End-to-End MLOps Customer Segmentation Platform · Personal Project

Built and deployed a production-ready customer segmentation system from raw retail data to a FastAPI + Streamlit application. Delivered the full pipeline (EDA, ETL, feature engineering, KMeans clustering, validation, explainability, Dockerized deployment) for single and batch scoring. Segmented 4,312 customers into 4 personas: Champions, At-Risk Loyalists, Potential Growth, and New / Passive, enabling targeted retention, reactivation, and upsell actions for marketing, CRM, and growth teams through explainable, persona-level intelligence

Python · Pandas · NumPy · Scikit-learn (KMeans) · Jupyter Notebooks · Matplotlib · Seaborn · FastAPI · Streamlit · Docker ·

CERTIFICATIONS

Samsung Innovation Campus — AI & ML: 10-week programme, capstone score 94% (top 6%)

Machine Learning Specialization — Coursera / Stanford DeepLearning.AI (Andrew Ng) — in progress

63H IoT PHPoC Certification — PHPoC South Korea · ISET Charquia

SKILLS

AI / ML Machine Learning · Deep Learning · NLP · Computer Vision · TensorFlow · PyTorch · Scikit-learn · Keras · RAG · Langraph

Data & EDA Pandas · NumPy · Matplotlib · Seaborn · Plotly · Jupyter · SQL
